Description :

SAIC is seeking an entry level Software Engineer in support of the U.S. Air Force's Technology, Application, Development, and Sustainment Program (TADS) is modernizing the Department of Defense's premier weather data center, providing environmental intelligence throughout the globe.

Our team is developing and sustaining the systems key to the Air Force's global weather analysis and forecasting mission in Omaha, Nebraska. The adoption of modern DevSecOps practices is a top-priority, and we are looking for self-starters who seize the initiative and are willing to lean-forward and help integrate new solutions into this complex enterprise.

Software Engineers will design, develop, and maintain software systems from science to operations within an empowered, cross-functional team.

Successful candidates will demonstrate the following characteristics: Growth Mindset Self-Starter Servant Leadership Grit Requirements

Qualifications :

- Bachelor's degree in Computer Science, Computer Engineering, Information Assurance, Cyber Security, or Data Science
- Must be a US Citizen and must be able to obtain a secret clearance
- Experience with programming languages such as Java, React, and Python Experience with configuration management tools (Git, Mercurial, ...)
- Familiarity with Agile methodologies

#SAICTADS

COVID Policy: Prospective and/or new employees will be required to adhere with SAIC's vaccination policy. All SAIC employees must be fully vaccinated and they must submit proof of vaccination on their first day of employment. Prospective or new employees may seek an exemption to the vaccination requirement at [Contact Us](#) and must have an approved exemption prior to the start of their employment. Customer site vaccination requirements, if more strict, will take precedence over SAIC's vaccination policy.
